

Ensure safe and productive web use

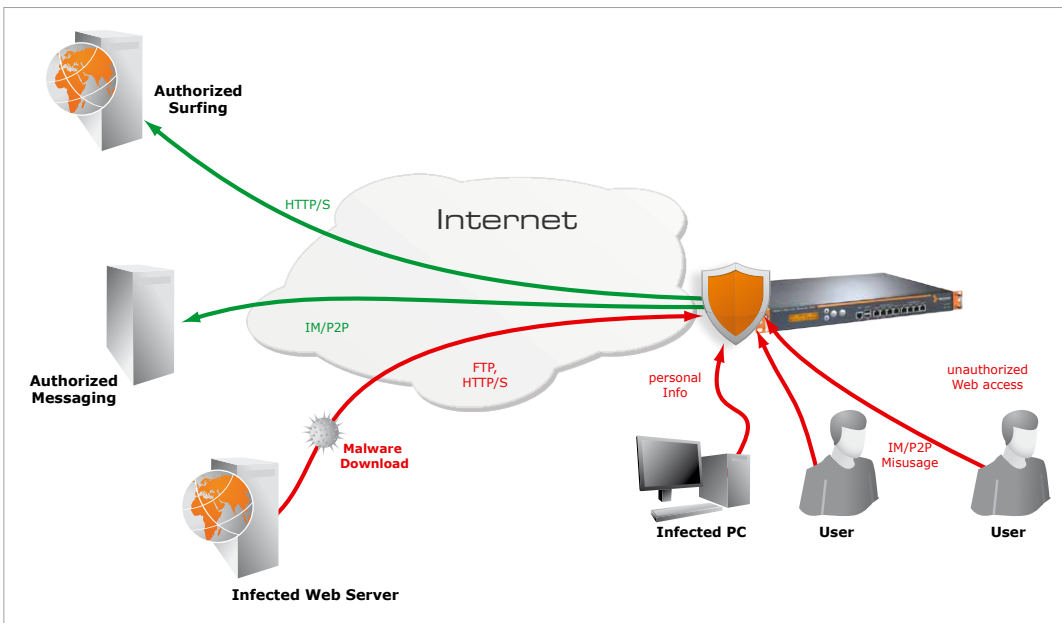

The unrestricted usage of the Internet, Instant Messaging, and Peer-to-Peer Programs not only reduces employee productivity, but can also lead to serious legal liability. Furthermore Malware hidden within downloads, needs to be filtered out to protect users and PCs from infection and data loss.

The Astaro Security Gateway Web Security subscription protects your organization and your users and gives you visibility into how they spend their time online.

Try Now!

Test Astaro Web Security free for 30 Days at:

www.astaro.com/en/freetrial

Benefits

- > Increase your employees productivity by enforcing surfing policies
- > Reduce legal liability risks by blocking access to certain websites
- > Prevent network outages and data loss caused by virus or spyware infections
- > Stop employees from using IM and P2P programs circumventing security measures
- > Keep an always up-to-date overview about the web usage within your organization
- > Easily use your authentication servers for creating profiles by user or group

Productive

Ensure Surfing Rules

Select from 96 categories to stop access to illegitimate and non-productive websites at configurable times

Control Chat and P2P

Monitor or block the use of Instant Message and Peer-to-Peer applications, including Skype and Bittorrent.

Secure

Prevent Infection

Perform fast, accurate scanning for viruses, spyware and active content via dual independent antivirus engines.

Stop Data Leakage

Block hidden sending of personal information from already infected PCs to the outside world.

Visible

Log and Report

Access a detailed record of all surfing activity per-user showing usage and abuse, even over encrypted HTTPS.

Protect Privacy

Enable anonymization of user names within reporting data to enforce privacy policies

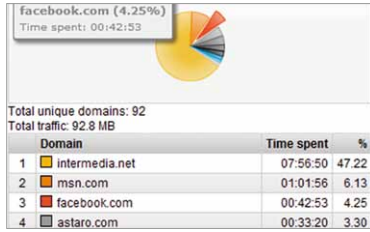

"With Astaro Web Security our employee casual surfing and time-wasting dropped by about 75%."

Michael Mierwinski, CIO Mid-America Overseas
